

Value of 1904 Recut Dies of Two Cents Carmine, Die 110

Watermark 14

Many shades of carmine occur on practically all types and sizes of envelopes. These shades may range from a deep lake or maroon through various reds, orange-reds, and rose or pink. While they are too varied to catalog, the shades are collectible and usually command a small premium.

The recuts below are according to definitions of Frotos C. Drakos in The 2-Cents Recut Dies, The Hartford Issue published by The Cardinal Spellman Philatelic Museum. Weston MA in 1977 The book is out of print but generally available from philatelic book dealers.
